^{*} Dimensions and shipping weight will vary slightly.

No shims, spacers, guage bars, guage bar clips, or cams to adjust.

Vend-mechanisms are self-priming for additional time-savings at product set-up.: Simply move the back spacer, adjust the product slide and select the appropiate depth setting to set-up a column for a different vend product.

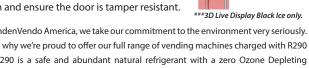

Slide out loading rack allows for greater access to the coulmns during product loading.

Rugged top retainer ensures consistent product alignment every time the door is closed.

The V21's epoxy coated vend chute provides smooth product delivery.

***Mounting brackets secured to the door frame with carriage bolts prodive optimum security and ease of installation.

Permanent studs protrude through pre-drilled holes on the door frame to reduce vandalism and ensure the door is tamper resistant.

- Energy management features included on every model make the V21 one of the most energy efficient machines available: LED lighting, real time clock, lighting and refrigeration controls, cyclopentane injected foam insulation (HFC free).
- Full function MDB controller with DEX/UCS, recycler and wireless telemetry compatibility standard on all models.
- The V21 stack allows for maximum flexibility during product loading and most products can be loaded caps to back, butt-to-butt, or in combination.
- The V21 utilizes 24 volt, DC motors that are installed with only two screws for easy servicing. No microswitches or timing cams!
- The time tested V21 product delivery system design ensures reliable vending due to reduced sensitivity to package diameter and shape.
